

FEEM Lecture on

## “THE RISE OF TIGHT OIL: A GLOBAL ENERGY REVOLUTION”

by **Bahattin Buyuksahin**, Bank of Canada  
and **Bassam Fattouh**, Oxford Institute for Energy Studies

Milan, Tuesday, December 3, 2013  
Fondazione Eni Enrico Mattei  
Corso Magenta 63

The technological revolution ignited by the extraction of non-conventional oil marks a turning point in internationally consolidated political and economic scenarios. Important geopolitical and macro-micro economic transformations are likely to happen in the near future and must be addressed. In order to tackle these challenging and timely topics, Fondazione Eni Enrico Mattei, within its "Economy and Society" Research Programme, organises a Lecture on the quantitative dimension of the possible impact of tight oil and the role of its revolution in the production framework worldwide.

**Bahattin Buyuksahin** and **Bassam Fattouh** - internationally acclaimed experts on the matter - will present the results of their recent studies on tight oil focusing on its implications in terms of pricing, crude oil and petroleum products trade flows and its impact on key producers.

### Agenda

- 11.00 a.m. Introduction and welcome address by **Giuseppe Sammarco** - Executive Director, FEEM
- 11.10 a.m. **Lecture by Bahattin Buyuksahin** - Bank of Canada  
*"North American Oil Boom: Outlook and Challenges"*
- 11.45 a.m. *Cross-Discussion*
- 12.00 p.m. **Lecture by Bassam Fattouh** - Oxford Institute for Energy Studies  
*"Tight Oil Revolution in Global Perspective and Potential Implications on Middle East Producers"*
- 12.35 p.m. *Cross-Discussion*

Q&A

*A light lunch will follow*
