

ENERGY SCENARIOS AND POLICY

FEEM Research Programme

VOLUME III

THE POLITICS AND ECONOMICS OF EASTERN MEDITERRANEAN GAS

ABOUT THE BOOK

Since 2010, the Eastern Mediterranean region has become a hotspot of international energy discussions due to a series of gas discoveries in the offshore of Israel, Cyprus and Egypt. This book seeks to provide a comprehensive analysis of all these developments, with the ultimate aim of assessing the realistic implications of regional gas discoveries for both Eastern Mediterranean countries and the EU.

ABOUT THE AUTHOR

Simone Tagliapietra is Senior Researcher at the 'Energy: Scenarios and Policy' programme of the Fondazione Eni Enrico Mattei. He is also Research Fellow at Bruegel and Lecturer at the Università Cattolica del Sacro Cuore. Specialized in Euro-Mediterranean energy markets and policies, he also is the author of 'Energy Relations in the Euro-Mediterranean: A Political Economy Perspective' (Palgrave, 2017).

ABOUT THE SERIES

This book is the third of the series Energy Scenarios and Policies (ESP), designed upon the analogue research programme of the Fondazione Eni Enrico Mattei (FEEM). With this series Claeys & Casteels aims to publish interdisciplinary, scientifically sound, prospective and policy-oriented applied energy research, targeted at political and business decision makers.

TABLE OF CONTENTS

- Introduction
- Eastern Mediterranean gas: the big picture
 - Introduction
 - Egypt: the cornerstone of regional gas markets
 - The new offshore horizon: geology and legal aspects
 - Offshore developments in Israel
 - Offshore developments in Cyprus
 - Offshore developments in Egypt
 - Offshore developments in Lebanon
 - Offshore developments in Gaza
- Assessment of proposed gas export routes
 - Introduction
 - Israel-Jordan and Israel-Gaza pipelines
 - Israel-Cyprus-Greece pipeline
 - Israel-Turkey pipeline
 - Israel-Cyprus-Greece electricity interconnector
 - LNG plant at Vasilikos
 - (F)LNG plants in Israel
 - Israel-Cyprus pipelines to existing Egypt's LNG plants
- Assessment of key destination markets
 - Introduction
 - Europe
 - Turkey
 - LNG
- Energy: shaping factor for regional stability?
 - Introduction
 - Views from the regional experience
 - Views from the theory of International Relations
- The relevance of the Eastern Mediterranean gas for the EU energy and foreign policy
 - Introduction
 - The Energy Union initiative
 - The UfM Euro-Med Energy Platforms
 - The EU Neighbourhood Policy
 - Conclusions and policy recommendations
- References
